

18 NCAC 07J .0617 IDENTIFICATION AND ACCESS CONTROL

A technology provider shall implement personnel identification and access control measures for systems supporting the electronic notary solution that:

- (1) designate and authorize users;
- (2) assign access to its data and systems based on users' roles;
- (3) restrict non-privileged users from performing privileged functions;
- (4) review, manage, and monitor users' role-based access;
- (5) restrict notarial transaction process-related data access to authorized persons; and
- (6) delete, revise, or remove access for users:
 - (a) whose role changes; or
 - (b) who are no longer employed with the provider.
