

18 NCAC 07J .0903 VIDEO STANDARDS

A platform provider's communication technology shall enable:

- (1) comparison by the notary of a remotely located principal's facial features with the credential that was used for credential analysis;
- (2) visual communication between the notary, principals, and any additional participants, including interpreters and transliterators, for the duration of the notarial transaction; and
- (3) the remotely located principal for whom CART captioning is being provided and the speaker to see the CART captions.

Note: Visual communication includes American Sign Language and cued speech.

*History Note: Authority G.S. 10B-4; 10B-106; 10B-125(b); 10B-126; 10B-134.15; 10B-134.17; 10B-134.19; 10B-134.21; 10B-134.23;
Eff. July 1, 2025.*
